DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 20 September 2004 and 18 October 2004 have been entered.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 8-13, drawn to a heatable mixer in combination with other parts.

Group II, claims 14 and 15, drawn to a method of treating flour.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: While the Groups share some features, particularly two mixers and a dryer/cooler, this set of features is known in the art as evidenced by Wayne (US 3,519,431). Other features are not shared by the Groups such as filters and a valve system.

4. During a telephone conversation with Jim Larson on 08 November 2004 a provisional election was made with traverse to prosecute the invention of Group I,

claims 8-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 14 and 15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 8-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 8, the phrase "a second valve system" renders the claim indefinite because, as currently amended, claim 8 mentions no other valve system. It is unclear how many valve systems are required. It is suggested that the word "second" be deleted if applicant only intends that a single valve system be required. In claim 9, it is unclear which of the two batch mixers "the batch mixer" refers to. Each of claims 10-13 utilizes the phrase "is provided". It is unclear whether the elements "provided" are required elements of the claimed device, as the language of these claims would be literally satisfied if one or more separate and distinct devices

instead had these elements. It is suggest that a phrase such as "further comprising" be utilized if these elements are intended to be required aspects of the claimed invention.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Wayne (US 3,519,431). Regarding claim 8, Wayne ('431) discloses a heatable mixer (including A and optionally D and E), drying and cooling equipment, filters (G) and discharge equipment (for example 47,47a), wherein the heatable mixer is connected to a dryer/cooler (L) and the dryer/cooler is connected by a valve system (43) to a second batch mixer (M) which has devices for adding additives (see Fig. 1). Regarding claim 9, the batch mixer has a device having nozzle bars (for example 17a). Regarding claims 10-13, as discussed above, these claims do not clearly positively recite additional requirements for the claimed device, but instead discuss items "provided", such as a heating duct and another dryer/cooler and/or batch mixer. As indicated by the word "steam" in several instances in the drawings, heating ducts are provided. Additional mixers including 50, 59, 75, 87 and 100 are also provided.

Response to Arguments

10. The examiner agrees with applicant's remark that the currently amended claims satisfy the written description requirement.
